Introduction

The safety instructions and the user manual should be read through carefully before the product is used for the first time.

The person responsible for the product must ensure that all users understand these directions and adhere to them.

The symbols used have the following meanings:

⚠️ WARNING
Indicates a potentially hazardous situation or an unintended use which, if not avoided, will result in death or serious injury.

⚠️ CAUTION
Indicates a potentially hazardous situation or an unintended use which, if not avoided, may result in minor injury and/or appreciable material, financial and environmental damage.

Important paragraphs which must be adhered to in practice as they enable the product to be used in a technically correct and efficient manner.

Instrument Set-up

Charging the Li-Ion battery via USB

Charge the battery before using it for the first time. Use the provided cable to charge the battery. Plug the small end of the cable into the port of the device, and plug the end of the charger into an electrical socket. Select the appropriate connector for your country. The device cannot be used while it is charging.

The computer can also be used to charge the device, but this takes more time. If the device is connected to the computer via USB cable, you can download or delete the gallery. **It is not possible to upload any data.**

Charge batteries when battery symbol is flashing. While charging, the device may heat up. This is normal and should not affect the device’s lifespan or performance. If the battery gets hotter than 40°C / 104°F, the charger stops.

At a recommended storage temperature of -20°C to +30°C (-4°F to +86°F), batteries containing a 50% to 100% charge can be stored up to 1 year. After this storage period the batteries must be recharged.

To save energy, unplug the charger when not in use.

**CAUTION**

Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty. Use only Leica-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device.

If the device is connected to the computer via USB cable, you can download or delete the gallery. It is not possible to upload any data.
Instrument Set-up

Using the Smart Base

Fold out Smart Base.
Use it as mini tripod.

Tripod or Adapter thread

Unlock

Lock

Using the Smart Base Extension

The Smart Base Extension allows for stable targeting without unintentionally tilting the device.

Do not move or tilt the Smartbase during measuring.

We recommend the use of a tripod with the Leica FTA360-S adapter.
## Using the Touch Screen

Use only fingers to use the touch screen. Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction. Do not allow the touch screen to contact water. The touch screen may malfunction in humid conditions or when exposed to water. To avoid damaging the touch screen, do not tap it with anything sharp or do not apply excessive pressure to it with your fingertips.

### Tapping

Tap on the display to open an on-screen button or to make a selection. Tapping on the icon in the middle of the bottom line activates the distance measurement or triggers the camera.

### Dragging

Drag on the display to move to previous or to next screen in the galerie function.

### Pinching

Spread 2 fingers apart to zoom if pointfinder is activated.

Instead of using the touch screen, the normal keypad buttons can be used also.
### Operations

#### Switching ON/OFF

<table>
<thead>
<tr>
<th>ON</th>
<th>OFF</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="ON DIST" /></td>
<td><img src="image" alt="OFF" /></td>
</tr>
<tr>
<td>Device is turned OFF.</td>
<td>If no key is pressed for 180 sec, the device switches off automatically.</td>
</tr>
</tbody>
</table>

#### Clear

- **1x**  
  - Undo last action.
- **2x**  
  - Leave actual function, go to default operation mode.

#### Message Codes

If the info icon appears with a number, observe the instructions in section "Message Codes". Example:

![Image](image)

---

### Permanent / Minimum-Maximum measuring

1. **ON DIST**
2. **OFF**
3. **ON DIST**

- **2 sec**
- Used to measure room diagonals (maximum values) or horizontal distance (minimum values)

- **min.**
- **max.**

- The minimum and maximum distance measured is displayed (min, max.). The last value measured is displayed in the main line.

- **min.** 8.532 m
- **max.** 8.532 m

### Add / Subtract

1. **ON DIST**
2. **+ / -**
3. **ON DIST**
4. **=**

- **7.332 m**  
  - The next measurement is added to the previous one.
- **7.332 m**  
  - The next measurement is subtracted from the previous one.

- **12.847 m**  
  - This process can be repeated as required. The same process can be used for adding or subtracting areas or volumes.

- **20.179 m**
Pointfinder (Viewscreen)

This is a great help for outdoor measuring. The integrated pointfinder (viewscreen) shows the target on the display. The device measures in the middle of the cross hair, even if the laser dot is not visible. Parallax errors occur when the pointfinder camera is used on close targets, with the effect that the laser appears displaced in the crosshair. In this case the error is automatically corrected with a shift of the crosshair.

* OV = Overview

Screenshot

Screenshot photo is saved in gallery.
Memory

1. Take over value for further actions.

2. Use Up/Down navigation keys to show more detailed results of the specific measurement.

3. Use Left/Right navigation keys to switch between measurements.

Pointfinder needs to be switched off.
## Settings Overview

- **FUNC**

### Tilt units

Switch between the following units:

<table>
<thead>
<tr>
<th>Tilt units</th>
<th>360.0°</th>
<th>0.00 %</th>
</tr>
</thead>
<tbody>
<tr>
<td>± 180.0°</td>
<td>0.0 mm/m</td>
<td></td>
</tr>
<tr>
<td>± 90.0°</td>
<td>0.00 in/ft</td>
<td></td>
</tr>
</tbody>
</table>

Confirm setting.  
Exit settings.
Move Alert of Levelling

Choose the sensitivity of the levelling, which is needed for some measuring functions. FINE means, that the levelling of the device is sensitive to any small vibrations. Choose ROUGH when working in harsh construction environment with many shocks and vibrations. In this case the accuracy is decreased in correlation with the movements.

Confirm setting.

Exit settings.
**Distance units**

1. **Switch between the following units:**
   - Art. No. 805080:
     - 0.00 m 0.00 ft
     - 0.000 m 0.00 in
     - 0.0000 m 0 in 1/32
     - 0.0 mm 0'00" 1/32
   - US-Model Art. No. 808183:
     - 0.00 m 0 in 1/16
     - 0.000 m 0'00" 1/16
     - 0.0000 m 0 in 1/8
     - 0.0 mm 0'00" 1/8
     - 0.00 ft 0 in 1/4
     - 0.00 in 0'00" 1/4
     - 0 in 1/32 0.000 yd
     - 0'00" 1/32

2. **Confirm setting.**
3. **Exit settings.**
**Settings**

**Beep ON/OFF**

1. ON
2. OFF
3. To switch ON, repeat procedure.
4. Exit settings.

**Digital level ON/OFF**

1. ON
2. OFF
3. To switch ON, repeat procedure.
4. Exit settings.

**De-/Activate keylock**

1. OFF
2. ON
3. To deactivate, repeat procedure. The keylock is active if device is switched off.
4. Exit settings.

**Switch on with keylock**

1. ON
2. within 2 sec
Special Bluetooth® Settings

Figure Mode: Use this mode if the data needs to be transferred in figures, e.g. working with spread sheets. Ft/in fractional is converted into ft/in decimal. An additional press on the Bluetooth® Settings Icon allows further adjustments for data transfer.

Device is connected. Favorites disappear and two softkeys appear:

- Allows the arrow keys to move the cursor on your computer.

- Sends the value of the main line to the computer.

Text Mode: Use this mode if the data needs to be transferred as text, e.g. working with word processing programs.

Device is connected. Favorites disappear and two softkeys appear:

- Allows the arrow keys to move the cursor on your computer.

- Sends the value of the main line to the computer.

App Mode: Use this mode to transfer the data using an App.

Special properties: ENCRYPTED is the default setting. In case of trouble with data transfer, select mode UNENCRYPTED.

Special WLAN Settings

Available WLAN network can be choosen with the possibility to enter a password. Recommended for GIS applications.

WLAN: DISTO™ acts as hotspot.

Data transfer unsecured or secured with serial number as password. Recommended for standard use.
**Bluetooth® data transfer**

Connect the device with your smart phone, tablet, laptop,…  
The actual measurement is transferred automatically if Bluetooth® connection is established. To transfer a result from the main line, press =. Bluetooth® switches off as soon as the laser distance meter is switched off.

The efficient and innovative Bluetooth® Smart module (with the new Bluetooth® standard V4.0) works together with all Bluetooth® Smart Ready devices. All other Bluetooth® devices do not support the energy saving Bluetooth® Smart Module, which is integrated in the device.

We provide no warranty for free DISTO™ software and offer no support for it. We accept no liability whatsoever arising from the use of the free software and we are not obliged to provide corrections nor to develop upgrades. A wide range of commercial software can be found on our homepage. Apps for Android® or Mac iOS can be found in special internet shops. For more details, see our homepage.

**WLAN data transfer**

Only data from the function Point Data transmission can be transferred with WLAN. A corresponding program is needed to receive the data, e.g. DISTO™ transfer. For more details, see our homepage.
Calibration of tilt sensor (Tilt Calibration)

1. Place device on absolutely flat surface.
2. Turn the device horizontally by 180° and place it again on absolutely flat surface.
3. After 2 sec the device goes back to the basic mode.
**Personalized favorites**

1. Select favorite function.
2. Press selection key left or right. Function is set as favorite above the corresponding selection key.

**Illumination**

1. Select brightness.
2. Confirm setting.
3. Exit settings.

**Touch Screen ON/OFF**

1. To deactivate, repeat procedure.
2. Exit settings.

Select your favorite functions for quick access.

Short cut: Press 2 sec on a selection-key in the measuring mode. Select your favorite function and press again short on the corresponding selection key.

To save power reduce brightness if not necessary.
**Compass Adjustment**

**Adjusting the magnetic declination**

Depending on your geographic location, the angle of declination may vary from other locations, as the geographic and magnetic poles are aligned. However, if the reference location is not selected, the difference in declination between the poles can differ greatly. For best results, select the nearest geographic reference point using the steps below.

1. Select the nearest location and the device adjusts the declination accordingly.
2. Confirm
3. Back
4. Confirm
5. Exit settings.
Offset

1. An offset adds or subtracts a specified value automatically to or from all measurements. This function allows tolerances to be taken into account. The offset icon is displayed.

Reset

1. Second confirmation with selection keys:

   Refuse:   Confirm:

2. Exit settings.

   i. Reset returns the instrument to the factory settings. All customized settings and memories are lost.

   A HARDWARE-RESET is done by pressing 15 sec on ON/DIST key.
Connect the device with USB to your computer.

Software updates with corresponding instructions can be found on our homepage www.disto.com.

Make sure that you use always the newest software version.
## Functions

### Overview

<table>

</table>
Calculators

1. Select key on display.
2. Confirm every key.
3. Use selection keys for clear or result.

The measurement result from the main line is taken over to the calculator and can be used for further calculations. Ft/in fractions are converted into ft/in decimal. To take over a result from the calculator in the basic mode press DIST before leaving the calculator function.

Smart Horizontal Mode

1. Aim laser at target.
2. ON DIST
3. 4.827 m
4. 40.8° α
5. 5.204 m x
6. 0.032 m y

( up to 360° and a transverse tilt of ±10°)
**Smart Angle measurement**

1. Aim laser at point on first wall.
2. Aim laser at corner.
3. Aim laser at point on second wall.
4. Continues distance and angle measurement.

**Level**

1. Displays inclinations of 360° with a transverse inclination of +/- 10°. Instrument beeps at 0° and 90°. Ideal for horizontal or vertical adjustments.
Measuring single distance

1. Aim active laser at target.

2. Measure distance.

3. ON DIST

4. Target surfaces: Measuring errors can occur when measuring to colourless liquids, glass, styrofoam or semi-permeable surfaces or when aiming at high gloss surfaces. Against dark surfaces the measuring time increases.

Distance: 8.532 m
**Functions**

**Point to point measurements**

1. Initialize device for vertical and horizontal values. See "Leveling".

2. Aim laser at first target.

3. Aim laser at second target.

4. Level the device and further values are displayed!

5. Rotate the device two times clockwise 90°. Follow the instructions on the display. Leveling is finished when OK icon appears on the display.

6. For levelling, Smart Base has to be folded out and device needs to be in an inclination range of +/-5°.

**Check status line:**
- indicates proper levelling
- indicates insufficient levelling
- indicates that smart base was tilted and can affect measuring accuracy

**Levelling**

- Level the device to get more measuring data.
- Do not move device after levelling.

Leica DISTOTM S910 808167a
**DXF data capture**

1. Levelling is mandatory! For levelling, Smart Base has to be folded out and device needs to be in an inclination range of +/-5°.

2. Rotate the device two times clockwise 90°. Follow the instructions on the display. Levelling is finished when OK icon appears on the display. Do not move device after levelling!

3. Aim at first point.

4. Aim at additional points (max. 30)

5. Leave actual function, go to default operation mode.

6. Stops DXF capture and saves data.

7. Max. 20 DXF files can be generated (with 30 measuring points/photos each).

*If pointfinder is switched on, the corresponding photos are saved with a resolution of 300 x 400 dpi.*

*Do not forget to save your data!*

Check status line:
- indicates proper levelling
- indicates insufficient levelling
- indicates that Smart Base was tilted and can affect measuring accuracy
Tap on the camera icon in the middle of the bottom line to take a photo.
For screenshots, press camera key for 2 sec.

* OV = Overview
**Volume**

1. Aim laser at first target point.
2. Second distance
3. First distance
4. Third distance
5. Volume

<table>
<thead>
<tr>
<th>First distance</th>
<th>Second distance</th>
<th>Third distance</th>
<th>Volume</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.744 m</td>
<td>2.338 m</td>
<td>2.431 m</td>
<td>32.653 m³</td>
</tr>
</tbody>
</table>

Use Up/Down navigation keys to show more results.

Ceiling/floor area
- 13.430 m²

Wall areas
- 39.300 m²

Circumference
- 16.164 m
Smart Area measurement

1. Aim at first point.

2. 5.873m

3. Aim at additional points (max. 30)

4. 2.075m

5. Point to Point distance between the last two measured points

6. 84.675m²
**WLAN data transmission**

1. **For levelling,** Smart Base has to be folded out and device needs to be in an inclination range of +/-5°.
2. Rotate the device two times clockwise 90°. Follow the instructions on the display. Levelling is finished when OK icon appears on the display.
   - Check status line:
     - indicates proper levelling
     - indicates insufficient levelling
     - indicates that smart base was tilted and can affect measuring accuracy

3. Aim laser at first point.
4. 13.207 m
   - WLAN data transfer of point coordinates
   - with pointfinder photo
   - without pointfinder photo

5. Aim at additional points.
6. Leave actual function, go to default operation mode.

7. Data transfer works only with WLAN.
If the device is connected to the computer via USB cable, you can download or delete the gallery. It is not possible to upload any data.
Functions

Area

1. Aim laser at first target point.
2. Aim laser at second target point.
3. The result is shown in the main line and the measured value above.
4. Partial Measurements / Painter function: Press + or - before starting the first measurement. Measure and add or subtract distances. Finish with =. Measure 2nd length.
**Sloped objects**

1. Aim laser at upper target point.

2. Aim laser at lower target point.

3. Use Up/Down navigation keys to show more results.

4. Indirect distance measuring between 2 points with additional results. Ideal for applications such as length and slope of roof, height of chimneys,…

   It is important, that the instrument is positioned in the same vertical plane as the 2 measured points. The plane is defined by the line between the 2 points. This means, that the device on the tripod is only moved vertically and not turned horizontally to reach both points.
It is absolutely necessary to aim with the laser perpendicular to the object.

If necessary, use the Zoom for precise aiming.

Select arrows with the cursor keys or by tapping on the display and adjust with softkeys. Corresponding width is calculated.

Distance to object

Exit.
Functions

Timer

1. Select release time.

2. Confirm setting.

3. The self release starts if ON/Measure key is pressed.
**Functions**

**Triangular area**

1. Aim laser at first target point.
2. Aim laser at second target point.
3. Aim laser at third target point.

4. Use Up/Down navigation keys to show more results.

- First distance: 4.248 m
- Second distance: 4.129 m
- Third distance: 2.425 m
- Triangular area: 4.855 m²

- Angle between first and second measurement: 33.60°
- Circumference: 10.802 m
Height-profile measurement

1. Aim at reference point (REF).
2. Aim at additional points 1-5.
3. Horizontal distance to device: 2.042 m
4. Height difference to reference point (REF): 0.054 m
5. Exit function.

Ideal for measuring of height differences to a reference point. Can be also used to measure profiles and terrain sections. After measuring the reference point, the horizontal distance and height is displayed for each following point.
**Functions**

**Diameter**

1. **Adjustment**
2. **Zoom**
3. **Aim laser perpendicular to the middle of the round object.**

4. **4x, 2x, 1x**
   - If necessary, use the Zoom for precise aiming.
5. **Select arrows with the cursor keys or by tapping on the display and adjust with softkeys. Corresponding diameter is calculated.**

6. **Confirm measurement.**
7. **More results are displayed.**
   
   - Circumference
   - Circular area
8. **Exit.**
Adjusting measuring reference

1. Distance is measured from the rear of the device (standard setting).

2. Distance is measured from the front of the device (lock symbol = permanently).

3. The orientation of the Smart Base is automatically detected and the zero point is accordingly adjusted.

4. Confirm setting.

If device is switched off, reference goes back to standard setting (rear of the device).
**Pythagoras (2-point)**

1. Aim laser at first target.
2. Aim laser at second target.
3. The result is shown in the main line.

- 25.133 m
- 21.383 m
- 13.207 m

Pressing the measuring key for 2 sec in the function activates automatically Minimum or Maximum measurement.

We recommend to use the pythagoras only for indirect horizontal measuring. For height measuring (vertical) it is more precise to use a function with the inclination measuring.
**Functions**

**Height tracking**

1. **ON DIST**
2. **ON DIST**
3. **ON DIST**
4. **ON DIST**
5. **ON DIST**
6. **ON DIST**
7. **ON DIST**
8. **ON DIST**

1. Aim laser at lower point.
2. Aim laser at upper points and angle/height tracking starts automatically.
3. Tracking angle if device is turned on tripod
4. Tracking height if device is turned on tripod
5. Tracking angle if device is turned on tripod
6. Tracking height if device is turned on tripod
7. Tracking angle if device is turned on tripod
8. Tracking height if device is turned on tripod

**Heights of buildings or trees without suitable reflective points can be determined. At the bottom point, distance and tilt is measured - which needs a reflective laser target. The upper point can be targeted with the pointfinder / crosshair and does not need a reflective laser target as only the inclination is measured.**
**Area from Photo**

1. **Aim perpendicular to the horizontal center line of the area.** This area must be perfectly flat on the vertical plane.

2. If necessary, use the Zoom for precise aiming.

3. Select arrows with the cursor keys or by tapping on the display and adjust with softkeys. Corresponding area is calculated.

4. Confirm measurement.

5. Exit.
Functions

Compass

1. Calibrate Compass?

2. Confirm

3. The arrow always points to true north.

4. Exit.

At the following places the compass probably does not work correctly:

- Inside of buildings
- Close to high voltage lines (e.g. on train platforms)
- Close to magnets, metal objects or electrical household appliances

If an error message occurs, the device is tilted too much (>20° over the front / > 10° side-wise).

Keep the device away from any magnet!

Calibration of Compass:

The compass has to be calibrated before every first measurement after switching on the device.

Rotate the device slowly in a figure 8 motion until OK icon appears on the display.

After 2 sec the device goes back to the compass mode.
Pythagoras (3-point)

1. Aim laser at first target.
2. 24.298 m
3. 21.264 m
4. 23.018 m
5. 20.571 m

The result is shown in the main line. Pressing the measuring key for 2 sec in the function activates automatically Minimum or Maximum measurement.

We recommend to use the pythagoras only for indirect horizontal measuring. For height measuring (vertical) it is more precise to use a function with inclination measurement.
Trapezium

1. Aim laser at upper point.
2. Aim laser at 2nd point.
3. Use Up/Down navigation keys to show more results.
4. Trapezium area
   - 78,383 m²
5. 20.9°
Functions

Stake out

Two different distances (a and b) can be entered to mark off defined measured lengths.

1. Select digit.
2. 1.012 m
3. Adjust digit.
4. 1.012 m
5. Approve value "a".
6. Adjust value "b".
7. Approve value "b" and start measurement.
8. Move device slowly along the stake-out line. The distance to the next stake out point is displayed.

0.240 m is missing up to next 0.625 m distance.

When approaching a stake out point to less than 0.1 m the instrument starts to beep. The function can be stopped by pressing the CLEAR/OFF button.
## Technical Data

### Distance measurement (ISO 16333-1)

---

* favourable conditions are: white and diffuse reflecting target (white painted wall), low background illumination and moderate temperatures.
** unfavourable conditions are: targets with lower or higher reflectivity or high background illumination or temperatures at the upper or lower end of the specified temperature range.
*** Tolerances apply from 0.05 m to 10 m with a confidence level of 95%. With favourable conditions the tolerance may deteriorate by 0.05 mm/m for distances between 10 m to 30 m, by 0.10 mm/m between 30 m and 100 m and by 0.20 mm/m for distances above 100 m.
With unfavourable conditions the tolerance may deteriorate by 0.10 mm/m for distances between 10 m to 30 m, by 0.20 mm/m between 30 m and 100 m and by 0.30 mm/m for distances above 100 m.
**** after user calibration. Additional angle related deviation of +/- 0.01° per degree up to +/- 45° in each quadrant. Applies at room temperature. For the whole operating temperature range the maximum deviation increases by +/- 0.1°.

At a recommended storage temperature of -20°C to +30°C (-4°F to +86°F), batteries containing a 50% to 100% charge can be stored up to 1 year. After this storage period the batteries must be recharged.

For accurate indirect results, the use of a tripod is recommended. For accurate tilt measurements a transverse tilt should be avoided.
**Message Codes**

If the message **Error** does not disappear after switching on the device repeatedly, contact the dealer.

If the message **InFo** appears with a number, press the Clear button and observe the following instructions:

**Warranty**

**Warranty under PROTECT by Leica Geosystems**

**Lifetime Manufacturer's Warranty**
Warranty coverage for the entire usage time of the product under PROTECT according to Leica Geosystems International Limited Warranty and PROTECT General Terms & Conditions set out under www.leica-geosystems.com/protect. Free of charge repair or replacement of all products or any parts under PROTECT that suffer defects as a result of faults in materials or workmanship.

**3 Years No Cost**
Additional services should the product under PROTECT become defective and require servicing under normal conditions of use, as described in the user manual, at no additional charge.

To receive the "3 years No Cost" period, the product under PROTECT must be registered at http://myworld.leica-geosystems.com within 8 weeks of the purchase date. If the product under PROTECT is not registered, a "2 years No Cost" period applies.

---

**Safety Instructions**

The person responsible for the instrument must ensure that all users understand these directions and adhere to them.

**Areas of responsibility**

**Responsibilities of the manufacturer of the original equipment:**
Leica Geosystems AG
Heinrich-Wild-Strasse
CH-9435 Heerbrugg
Internet: www.disto.com

The company above is responsible for supplying the product, including the User Manual in a completely safe condition.

The company above is not responsible for third party accessories.

**Responsibilities of the person in charge of the instrument:**
- To understand the safety instructions on the product and the instructions in the User Manual.
- To be familiar with local safety regulations relating to accident prevention.
- Always prevent access to the product by unauthorised personnel.

---

**Permitted use**
- Measuring distances
- Tilt measurement
- Data transfer with Bluetooth® / WLAN

**Prohibited use**
- Using the product without instruction
- Using outside the stated limits
- Deactivation of safety systems and removal of explanatory and hazard labels
- Opening of the equipment by using tools (screwdrivers, etc.)
- Carrying out modification or conversion of the product
- Use of accessories from other manufacturers without express approval
- Deliberate dazzling of third parties; also in the dark
- Inadequate safeguards at the surveying site (e.g. when measuring on roads, construction sites, etc.)
- Deliberate or irresponsible behaviour on scaffolding, when using ladders, when measuring near machines which are running or near parts of machines or installations which are unprotected
- Aiming directly in the sun

---

Safety Instructions

⚠️ WARNING
Watch out for erroneous measurements if the instrument is defective or if it has been dropped or has been misused or modified. Carry out periodic test measurements. Particularly after the instrument has been subject to abnormal use, and before, during and after important measurements.

⚠️ CAUTION
Never attempt to repair the product yourself. In case of damage, contact a local dealer.

⚠️ WARNING
Changes or modifications not expressly approved could void the user’s authority to operate the equipment.

Limits of use

Refer to section "Technical data". The device is designed for use in areas permanently habitable by humans. Do not use the product in explosion hazardous areas or in aggressive environments.

Disposal

⚠️ CAUTION
Flat batteries must not be disposed of with household waste. Care for the environment and take them to the collection points provided in accordance with national or local regulations.
The product must not be disposed with household waste.
Dispose of the product appropriately in accordance with the national regulations in force in your country.
Adhere to the national and country specific regulations.
Product specific treatment and waste management can be downloaded from our homepage.

Electromagnetic Compatibility (EMC)

⚠️ WARNING
The device conforms to the most stringent requirements of the relevant standards and regulations.
Yet, the possibility of causing interference in other devices cannot be totally excluded.

FCC statement (applicable in U.S.)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
• This device may not cause harmful interference, and
• this device must accept any interference received, including interference that may cause undesired operation.

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:
• This device may not cause interference and
• this device must accept any interference, including interference that may cause undesired operation of the device.

Déclaration FCC, applicable aux Etats-Unis
Ce produit a été testé et ses limites ont été jugées conformes à celles prescrites pour les dispositifs numériques de classe B, décrites dans le paragraphe 15 des règles FCC. Ces limites ont pour but de fournir une protection raisonnable contre des interférences nocives dans une installation résidentielle.
Les appareils de ce type génèrent, utilisent et peuvent rayonner de hautes fréquences. Ils sont de ce fait susceptibles de perturber la réception radiophonique en cas d’installation non conforme aux instructions.
Même en cas de respect des instructions, l’absence d’interférences dans une installation particulière ne peut cependant être garantie. Si cet instrument perturbe la réception radiophonique ou télévisuelle, ce que l’on constate en éteignant puis en rallumant l’instrument, l’utilisateur peut tenter de corriger ces interférences en appliquant les mesures suivantes :
• Réorienter ou repositionner l’antenne de réception.
• Augmenter la distance entre l’instrument et le récepteur.
• Connecter l’instrument à un autre circuit que celui du récepteur.
• Consulter le revendeur ou un technicien expérimenté dans le domaine radio/TV.

Cet appareil est conforme à la section 15 des règlements FCC. Son fonctionnement est soumis aux deux conditions suivantes :
• cet appareil ne doit pas causer d’interférences nuisibles, et
• cet appareil doit accepter toute autre interférence reçue, y compris les interférences pouvant entraîner un fonctionnement non désiré.

Ce dispositif est conforme à la norme RSS-210 d’Industrie Canada. L’utilisation est sujette aux deux conditions suivantes :
• ce dispositif ne doit pas être la source d’interférences nuisibles, et
• ce dispositif doit accepter toutes les interférences, y compris les interférences pouvant诱导re des opérations non souhaitées.
Safety Instructions

Use of the product with Bluetooth®

⚠️ WARNING
Electromagnetic radiation can cause disturbances in other equipment, in installations (e.g. medical ones such as pacemakers or hearing aids) and in aircraft. It can also affect humans and animals.

Precautions:
Although this product conforms to the most stringent standards and regulations, the possibility of harm to people and animals cannot totally excluded.

• Do not use the product near petrol stations, chemical plants, in areas with a potentially explosive atmosphere and where blasting takes place.
• Do not use the product near medical equipment.
• Do not use the product in airplanes.
• Do not use the product near your body for extended periods.

Laser classification

The device produces visible laser beams, which are emitted from the instrument:
It is a Class 2 laser product in accordance with:
• IEC60825-1 : 2014 „Radiation safety of laser products“

Laser Class 2 products:
Do not stare into the laser beam or direct it towards other people unnecessarily. Eye protection is normally afforded by aversion responses including the blink reflex.

⚠️ WARNING
Looking directly into the beam with optical aids (e.g. binoculars, telescopes) can be hazardous.

⚠️ CAUTION
Looking into the laser beam may be hazardous to the eyes.

Labelling

Subject to change (drawings, descriptions and technical data) without prior notice.
